## 2Go Reader

## conpal LAN Crypt 2Go Reader

### conpal LAN Crypt 2Go Reader

conpal LAN Crypt 2Go Reader enables you to decrypt files encrypted with a password. This allows you to open securely shared .pcrypt files from a provider that uses conpal LAN Crypt 2Go to protect its communications with you. A web-based version is also available at [www.conpal.de/en/2-Go](http://www.conpal.de/en/2-Go) to provide encryption and decryption. The conpal LAN Crypt 2Go Reader is available on Windows.

### Functions

- ⚙ On-demand file decryption with password
- ⚙ English and German language version available

### System requirements

- ⚙ Windows 10 or higher

### Security

- ⚙ State-of-the-art encryption using AES-256 XTS algorithm and Argon2id key derivation

### User convenience

- ⚙ User-friendly integration supporting right-click-context menu options, drag & drop or standard file selection dialogue
- ⚙ Online help

### Description conpal LAN Crypt 2Go

conpal LAN Crypt 2Go enables cross-platform access to encrypted files. Both within an organization, team or workgroup, and outside, in contact with customers, clients or service providers. No jointly used security infrastructure is required. Data can be exchanged securely with users on Windows or Mac computers, iPhone, iPad, Android, or Linux using passwords. Users are empowered to define and use by passwords as needed. All data is in any case encrypted and decrypted directly on the local device, offering full protection no matter what communication channel is used ("data in transit"). This protection remains in place no matter which storage medium is used ("data at rest"). For users who do not want to install software, the conpal LAN Crypt 2Go web portal offers the possibility to encrypt or decrypt data. Here, too, no plain text data is transmitted - neither to conpal GmbH nor to the Internet provider or third parties.
